1. Medxat guide

Medxat®, an existent medical communication service, gives technological support to I-DTI.

We provide a codified channel to communicate following the international data protection directives. Use the platform in your computer using your usual browser or compatible mobile devices.

Once you complete the registration by sending your basic data to
Follow the next steps to start your I-DTI experience:

1) Access Medxat®

- Via web <https://app.medxat.com/>

Compatible browsers: Google Chrome, Firefox, Edge, Safari.

Or download it for mobile devices:

- Google Play Store:

<https://play.google.com/store/apps/details?id=com.asolutions.medxat&gl=ES>

- App Store:

<https://apps.apple.com/es/app/medxat/id1283026127>

2) Login with the e-mail used to register

To establish a password is necessary in your first login. You will receive an email to confirm your password, and will facilitate a direct access to the application.

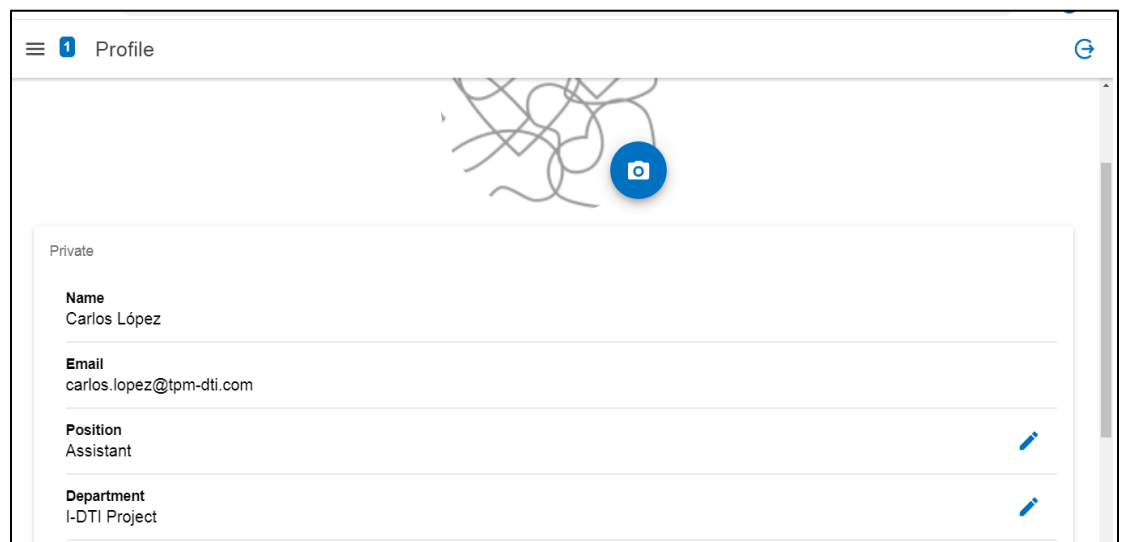

3) Once you are on the homepage, open the menu by clicking the three bars icon

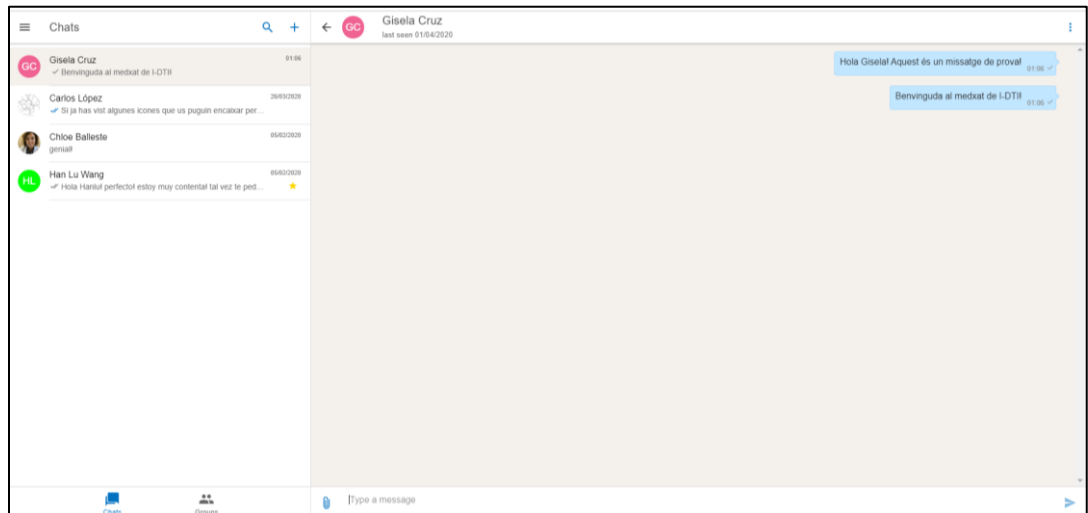

Here you can find multiple options:

- **Profile:** Custom your I-DTI application or change your password. Please take your time to fill all the gaps so we can make a statistical study.

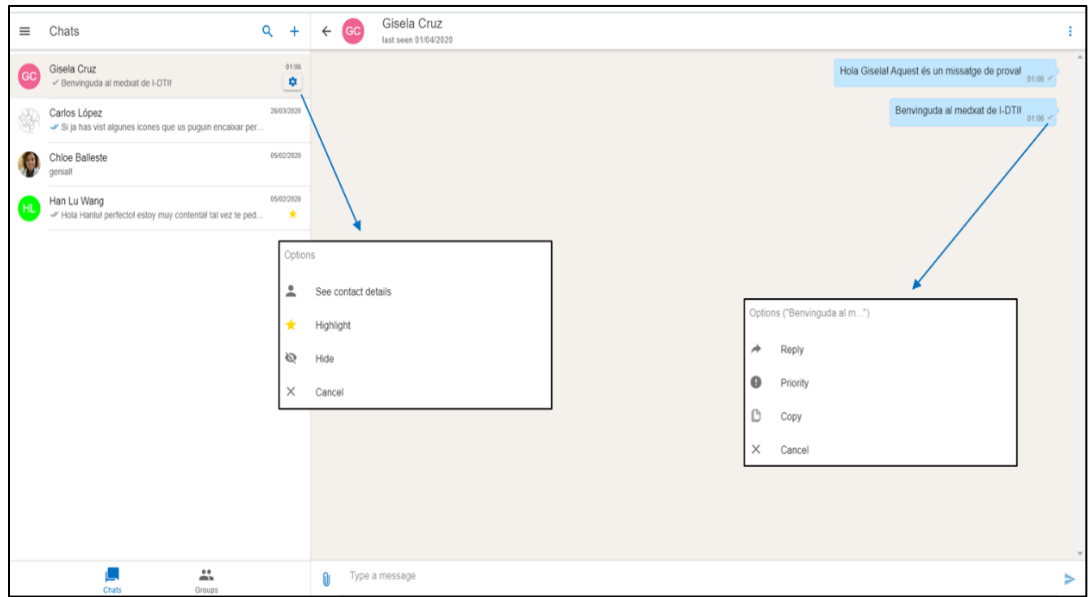

- **Chat:** Here you can share your knowledge and experience, create group chats or just chat with other participants. It runs like Whatsapp or Telegram, but all the communications are saved in a security and encrypted database.

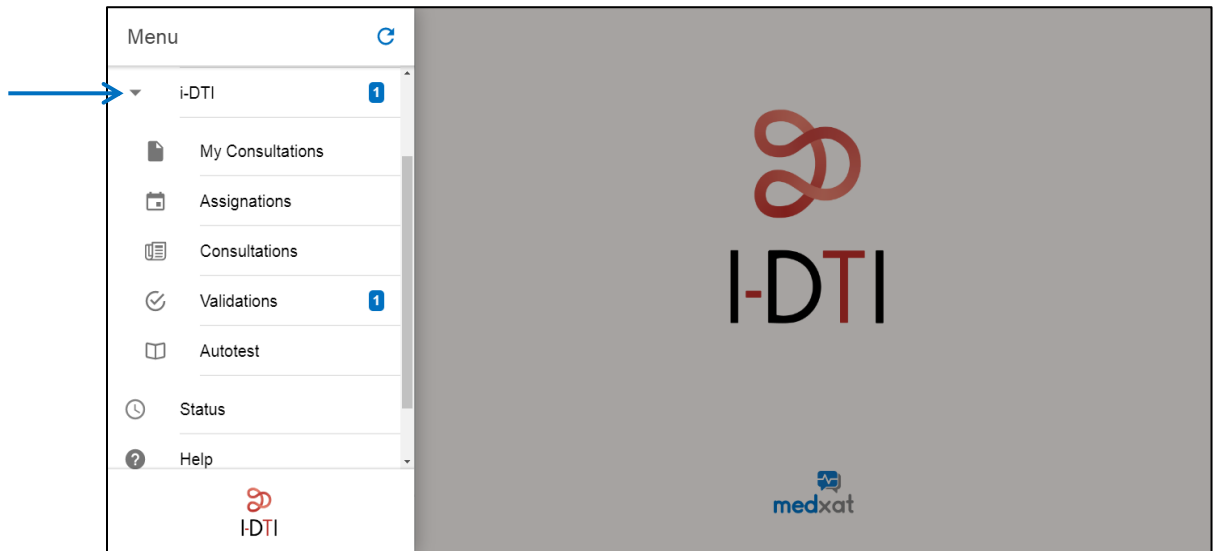

Functionalities:

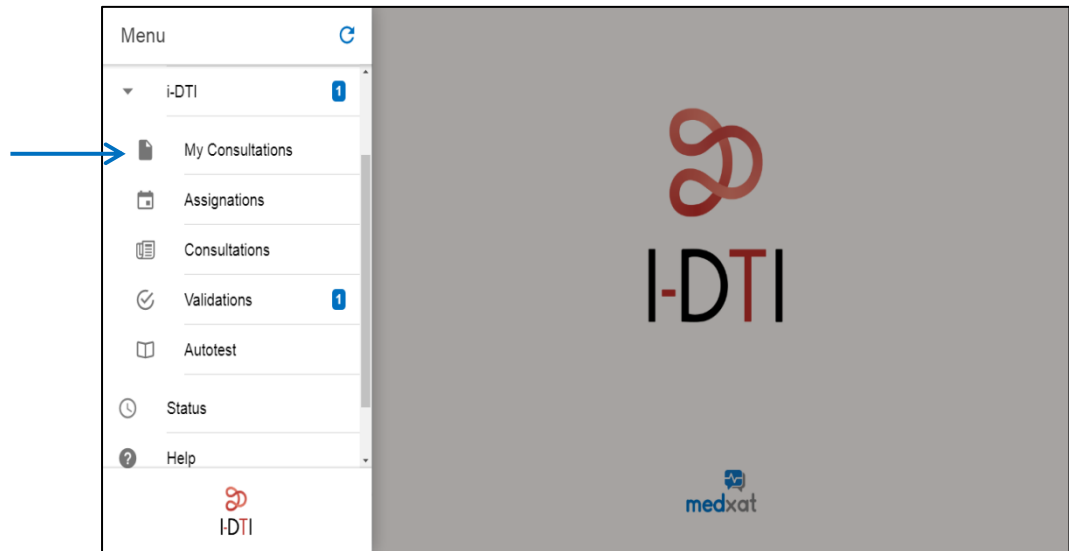

- **See contact details:** show you the user status, email, position and department.
- **Highlight:** Mark chats as a highlight.
- **Hide:** Hide lines of conversation. If you want to unhide, click on the three points on the right upper corner.
- **Replay:** Answer a message of the conversation.
- **Priority:** To mark a message as priority will automatically send an email to the email address of all recipients who have not read the message.
- **Copy:** Copy the selected message, to paste it where you want.

- **I-DTI Menu:** This menu offers you the options for consultations, or auto-test. Follow the next steps to see the procedure in order to complete a Consultation.

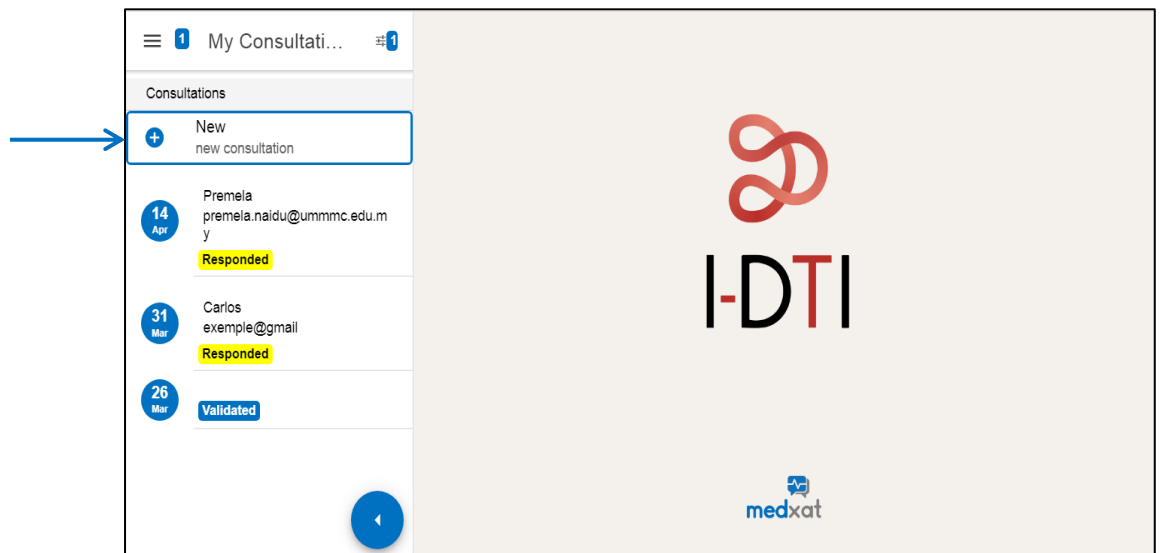

- **My consultations:** this section allows you to make a formal consultation

In this section you can find your consultations history, check the status queries, the expert assigned to your case and more.

Open a new consultation by clicking *+New Consultation*

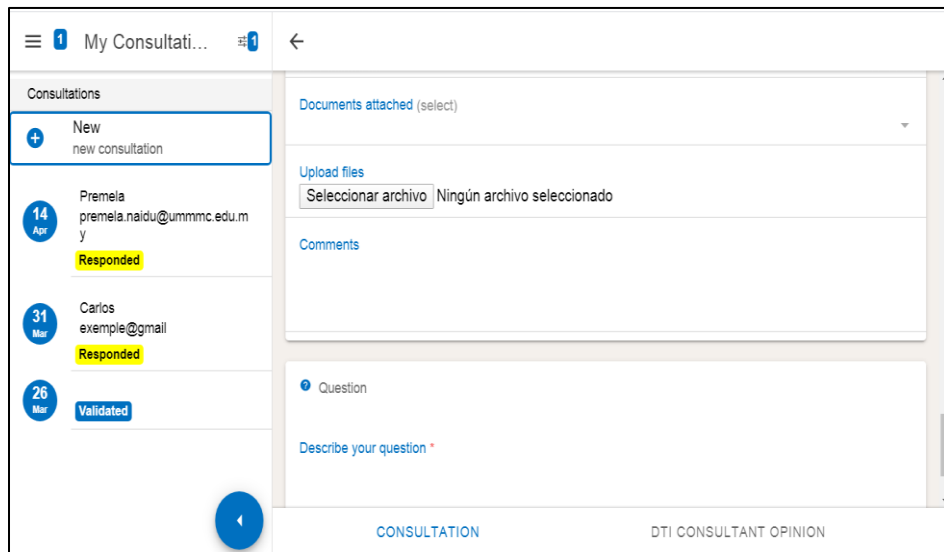

The screenshot displays the 'My Consultations' screen in the I-DTI mobile application. On the left, a list of consultations is shown with dates and status labels: 'New' (new consultation), '14 Apr' (Responded), '31 Mar' (Responded), and '26 Mar' (Validated). On the right, a form titled 'Consultant Information' is visible, containing fields for Name (Carlos), Surname (L), E-mail address (example@gmail.com), Phone (123456789), and Hospital Affiliated. A blue circular button with a left-pointing arrow is located at the bottom center of the screen. The bottom navigation bar includes 'CONSULTATION' and 'DTI CONSULTANT OPINION'.

1. Fill the form with your personal data,
2. Choose the area of interest: ask about donation, transplantation or post transplantation scenarios. You can choose the organ involved as well
3. According to your previous choice the form will vary in order to obtain specific data, this will help us to address your consultation to the most appropriate expert.

*Notice there are fields required to finalize your consultation.**

4. Upload documents, images or other media files if necessary
5. Describe the question to the expert

Once the query has been sent the expert will be notified and will answer as soon as possible.

When the diagnosis is validated you will see the Confirm validation icon next to your query.

Label guide:

Assigned

An expert has been assigned to your consultation

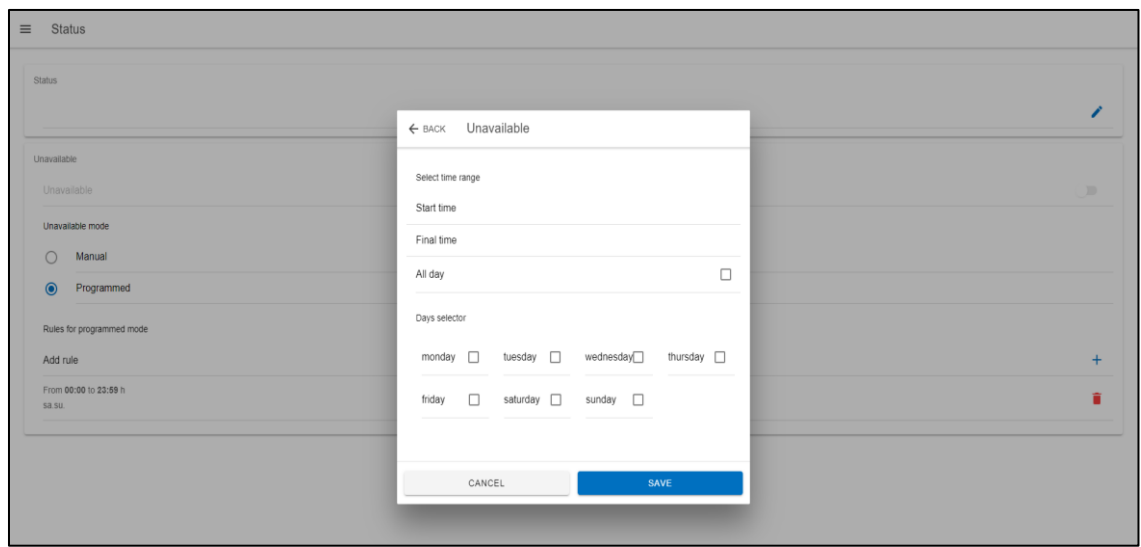

Responded

The expert has answered your consultation

Validated

Your consultation has been validated; the answer has been double checked by different experts

- **Status:** Within the status module you can determine the manual or programmed Unavailable status
 - When you enable the **Not Available mode**, no new alerts or messages will be received. Other users will see you as Unavailable
 - In **Scheduled mode** rules can be set to enable Automatically Not Available mode
